

DISCLAIMER

Use of the Electronic Content

This Medical Physics Electronic Content ("MPEC") was developed by an American Association of Physicists in Medicine ("AAPM") medical physics volunteer-based Task Group, Working Group or Committee based on the group's systematic review of current scientific and clinical information and broadly accepted approaches to medical physics research. This MPEC is intended for research purposes only and is not intended to be used for imaging, treatment, or diagnosis of a patient, or the quality assurance of any system or equipment used for patient care.

To the extent allowed by local law, this information is provided to you by AAPM, 'as is' without warranties or conditions of any kind, whether oral or written, express or implied. AAPM specifically disclaims any implied warranties or conditions of merchantability, satisfactory quality, non-infringement and fitness for a particular purpose. Some jurisdictions do not allow exclusions of implied warranties or conditions, so the above exclusion may not apply to you. You may have other rights that vary according to local law.

To the extent allowed by local law, in no event will AAPM, MPEC editors, or AAPMs subsidiaries, affiliates, or vendors be liable for direct, special, incidental, consequential or other damages (including lost profit, lost data, or downtime costs), arising out of the use, inability to use, or the results of use of the provided content, whether based in warranty, contract, tort or other legal theory, and whether or not advised of the possibility of such damages. Your use of the content is entirely at your own risk. Some jurisdictions do not allow the exclusion or limitation of liability for damages, so the above limitation may not apply to you.

AAPM does not endorse any specific products, manufacturers, or suppliers and nothing in this MPEC should be interpreted as implying such endorsement.
